---

I'm an M.Tech scholar in AI & Machine Learning at BITS Pilani and an AI Engineer focused on building advanced LLM-powered systems. I design intelligent multi-agent scalable workflows using LangGraph and LangChain with a strong foundation in ML, NLP, Deep Learning, statistics, and SQL, I create systems that go beyond data processing-enabling reasoning, adaptability, and real business impact.

## WORK EXPERIENCE

---

### Blueflame Labs Pvt. Ltd.

03/2025 - Present

AI Specialist

- Designed and deployed an **Agentic AI** application to automate **HRMS workflows** (leave, attendance, payslips, policies, ticketing, employee policy and general queries).
- Built **conversational AI pipelines** with **Advanced-RAG** and **multi-agent orchestration** for contextual accuracy.
- Integrated **LangGraph** for state-based workflow, **Tool bind search** for dynamic retrieval of internal/external knowledge, case studies, and company updates.
- **Developed secure RESTful API connectors** with HRMS systems for **real-time retrieval** and deployed solution via **Azure Bot Services** and embedded into **Microsoft Teams** for enterprise-wide self-service adoption.
- **Saved almost 50% of HR time and effort** by automating repetitive employee queries and streamlining policy/ticket resolution, ensuring **scalability**, reliability, and secure integration with HRMS systems.

### Capgemini

09/2024 – 03/2025

Generative AI Engineer

- Developed a web app using Python, **LangChain**, **OpenAI**, Faiss, and Streamlit, enabling the team to retrieve relevant project data from a database reducing duplicate efforts by **25%**.
- Streamlined project creation processes, saving over **30 hours** of manual effort per month and improving overall team efficiency.
- Leveraged advanced GenAI and **RAG** techniques to enhance search capabilities.

### Cognizant Technical Solutions

02/2022 – 08-2024

Data Scientist

- Built an **end-to-end solution** using **MySQL** for structured storage of customer feedback data (from surveys, forms, and reviews).
- Preprocessed text data with **Python (NLTK, scikit-learn)** including tokenization, stopword removal, and TF-IDF vectorization.
- Trained **classical ML models** (Logistic Regression, Random Forest, SVM) to classify customer feedback into sentiment categories (positive, negative, neutral).
- Applied **topic modeling (LDA)** to extract recurring themes, helping identify pain points and improvement areas.
- Developed a **web interface (HTML/CSS + FastAPI)** for querying insights, with visual dashboards showing trends in customer sentiment.

## PROJECTS

Chat with YouTube

08/2023 – 09/2023

- Engineered an advanced **Streamlit** application that empowers users to chat with **YouTube** videos by seamlessly transcribing audio via Whisper and **YouTubeTranscriptApi**.
- Leveraged **LangChain** and **HuggingFace** embeddings to efficiently split, process, and store text as vectors using **FAISS**, driving intelligent, context-aware AI interactions.
- Crafted a dynamic **ConversationalRetrievalChain** with **memory** capabilities, enabling nuanced, ongoing conversations that enhance user engagement.
- Integrated cutting-edge Gemma language model using **HuggingFace** and **Groq APIs**, delivering toptier **conversational AI** performance and rapid response generation.

Thyroid Detection

01/2023 – 03/2023

- Built a machine learning model to detect thyroid abnormalities using a dataset with more than **12,000** rows, performing Data Cleaning, Feature Engineering, Preprocessing and Model Building.
- Fine-tuned the model using a Decision Tree with a maximum depth of 8, achieving the test accuracy of **92%**.
- Deployed the model on AWS using a **Docker** image on **ECR** and running it on **EC2** and used **GitHub Actions** for **CI/CD** implementation.
- Used **Flask** to allow users to interact with the model through webpage. Technologies and libraries used are **Python, scikit-learn, MongoDB, Pandas, Docker, GitHub Actions, AWS**.

## SKILLS

|                |                |                |               |
|----------------|----------------|----------------|---------------|
| • Python       | • Scikit-learn | • LLMs, OpenAI | • Bert, GPT   |
| • NLTK         | • LangChain    | • CrewAI       | • GANs        |
| • MCP          | • LangGraph    | • Tensorflow   | • Docker      |
| • A2A          | • LangSmith    | • Keras        | • Git Actions |
| • Hugging Face | • GenAI        | • PyTorch      | • AWS, Azure  |

## EDUCATION

|                                                                                     |           |
|-------------------------------------------------------------------------------------|-----------|
| BITS Pilani, WILP                                                                   | 2024-2026 |
| • Course: <b>M.Tech in Artificial Intelligence and Machine Learning</b> , 7.77 CGPA |           |
| PES Institute of Technology                                                         | 2017-2021 |
| • Course: B.E in Mechanical Engineering, 8.46 CGPA                                  |           |

## CERTIFICATIONS and ACHIEVEMENTS

|                                                         |
|---------------------------------------------------------|
| • Databricks Certified Generative AI Engineer Associate |
| • Azure Fundamentals AZ-900                             |
| • Deep Learning Specialization: DeepLearning.AI         |
| • Won <b>Performer of the Year</b> award 2025-26        |
